

**Super fast.
Very powerful.
Most accurate.**

**Europe's leading technology
platform for Online Video.**

TV1EU
streaming europe™

(CDN)

content delivery network

The TV1.EU Content Delivery Network is one of Europe's biggest independent platforms for the management and distribution of audio and video content via IP. Our network of hundreds of high-performance servers delivers hundreds of millions of viewing minutes per month to our customers' audiences.

The TV1.EU CDN is incredibly reliable, with availability levels of 99.97 %. To meet market demands, we stream our customer content in **Flash, H.264, 3GPP, Windows Media, Real, Quicktime and MP3** format via our CDN.

Benefit from TV1. EU's Green Power CDN

- Geo location & Load balancing
- Amazing scalability and solid back-up
- Record-breaking delivery times and top image quality
- All contents for all devices in no time
- Streaming with 100% Energy taken from renewable sources

Geo location

Our geo-location system blocks any content not for distribution across all countries. And we hold pay-to-view content on our Secure Streaming System, which means only paying customers can view your high-value content.

The TV1.EU CDN has amazing scalability.

All systems are modular, have plenty of backup capacity and can be upgraded quickly as required. This means you can be sure of getting the best quality at the best price.

International Standards

Only selected data centres are good enough to meet our quality requirements. This is because, unlike other 'normal' kinds of web site hosting, the results of packet loss and long download times can be both seen and heard. Naturally, we keep to international standards and monitor them constantly. At all our data centres, we have gigabit uplinks with peering to the five major carriers.

Strong brands and innovative companies are putting their faith in TV1.EU technology:

The 2008 European Football Championships, the 2008 Olympic Games in Peking, ZDF, Deutsche Welle, arte, TV-total, Phoenix, myspass.de, 3sat, The German Touring Car Championships, HSE24, MDR, hr, Quelle, Volkswagen, and many more.

Conclusion:

Record-breaking delivery times and top image quality will win your users over, too!
